BAN TECK HAN offer high quality biodegradable food packaging that is a sustainable alternative to plastic, paper & styrofoam. At BTH, we strive to uphold the highest green standards to ensure product quality and performance.

BTH biogegradable products are made from natural starches, which reduces the amount of polypropylene material required. This results in much lighter carbon footprint and greater price stability. Our product includes bio lunch boxes, bio cutleries, bio cups, bio bowls, bio plates & bio carrier bags.

Besides bio products, we hereby introduce an eco-friendly alternative - Eco Plastic. Eco plastic is conventional plastic made from polymers such as PE, PP and PS, containing extra ingrediants and tested according to ASTM STANDARDS. The different of Eco Plastic and normal plastic is that Eco Plastic have small concentration of additives. The degradation of Eco Platic begins with a chemical process followed by a biological process.
